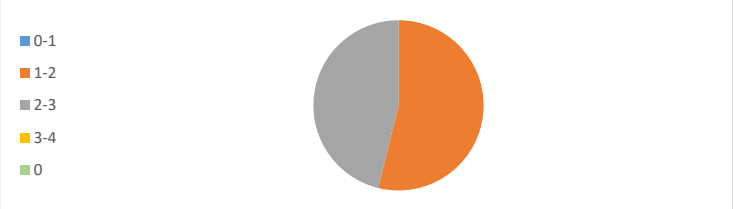
On average, how many hours per day did you spend working on this course outside of class?



0-1	0
1-2	7
2-3	6
3-4	0
0	0

What aspects of the course did you like best? What did you like the least?

1) When we actually applied what we learned it was fun. There was way too much work

2) the best was i learned something new in an interesting manner. The least was the course was for 3 hours, it is tough to concentrate for 3 hours, we should get some more breaks in between.

3) I really liked learning about the applications of statistics to economics and to the real world in general. At times, it was difficult to keep up with the class because of the amount content we learned in class.

4) I liked the least labs and group projects, I liked the homework for individual work

5) The thing that I liked best about this course is that i got the chance to learn about probabilities, z-scores and standard deviations and in addition I really enjoyed that we played games which was helping us understand the syllabus better of the course, i also liked the fact i got to learn how to use excel better. The thing that i didn't like about this course was that it was a bit hard.

6) It's good that we have activities and watch short videos in class. Also, teachers upload ppts and solutions for homework every time so that if students have any questions, we can figure them out using the materials. What makes me not satisfied is that though the course is called econometrics, it is actually all about statistics and is not really related to economics, which is different from what I expected and makes me a little bit disappointed。

7) Least liked - group work
Most liked - doing practice questions in class with the teacher

8) I believe the best aspects I like to this course is we have a really nice atmosphere, I am taking another course in Brown now which can not reach that. And I think the main reason for that is because we have two nice teachers, and I like my classmates a lot. The least like in this course I think is probably relate to some assignments, because it is a kind of problem for me to find some data or survey at the first time of the course to do some analysis. But I just want to say it is Ok since they have already offer some links to help us. In summary, this course is pretty good and useful.

9) In this course i liked the most,the fact that we had the chance to learn about the z-scores, mean and the standard deviation of a binomial random variable. In addition i was very interested to the fact that we played games in the classroom considering the syllabus that we learned.However, it was a bit hard for me, because the pace of the lesson was a bit fast.

10) I really liked working with probability combined with statistics. I also like doing group project and all the activities related to statistics that we did.

11) The lab days.

12) I liked the activities, not the homework

What about the instructor's teaching did you like best? What did you like least?

1) He showed some fun videos, he often made factual errors

2)

Best was that he was very helpful and generous, but he was a bit too fast.

3) He recognized that some parts of the class would be boring, so he tried to make it more engaging as best he could.

4) The teacher sometimes spent too much time on reviewing the homework/discussing a certain topic

5) the instructor was very good and was available at all times if we had any questions. in addition the instructor was always prepared and was very organised, he also explained things to us very clearly using different methods such as experiments of everyday issues using probabilities and used us the students as examples. the only thing that i have to say is that the pace of the lesson was sometimes a bit fast.

6) He tries his best to make everything clear and is always patient. He also prepares activities and videos to make the class more engaging. But it may be better if he could try different ways to teach instead of always giving lectures.

7) He never gave us worked examples in class which made some of the content unclear.

8) I think upload our daily PPT and solutions of homework is pretty nice, which help me to do some review and they help me to keep pace with the whole class a lot. Feedback is really important I believe for a student to handle the course. Because I have a really good impression on this course, I can not find the least like aspect on this course.

9) The instructor was a very good teacher. he was always prepared and available if i needed help. In addition he explained the lesson with different methods and by giving us examples. However the pace of the lesson was a bit fast.

10) The instructor was very well-prepared and was a very good teacher. He always gave examples and tried to teach difficult topics in a simple way. Sometimes in my opinion he was too fast but overall I liked him a lot.

11) I enjoyed his pace of the class as well as the group projects. I did not love having a test in the end.

12) He went fast, but sometimes wasn't in depth enough

SCORE:	1.62

What about the TA did you like best? What did you like least?

1) He was helpful.
2) He was very helpful in helping me with the exercises in the computer lab.
3) TA was willing to help
4) he was very helpful at the computer labs. when i had any problems he was able to explain to me how to use excel probably and was very organised. also he was very easy to approach.
5) He provides solutions to every homework and corrects students' homework carefully. But he does not always show up in class and is not so close to students.

6) He is really nice that even he only attend our course maybe for three times, but I could find the engaging he has to this course. He tries to remember everyone's name and he is willing to help us while met problems in Lab. So I would like to say he is pretty good TA.

7) The TA was approachable and he helped me when i needed help considering our lab sessions.

8) The TA was also very good at teaching and he always tried to help us when we didn't understand something about what he explained.

9) I loved the lab days he showed us.
10) He wasn't there most of the time
